REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The Examiner deems Ellenby et al. (US 6,396,475 B1) hereinafter Ellenby, Powers III (US 5,428,731) hereinafter Powers, Vachuska et al. (US 2003/0184584 A1) hereinafter Vachuska, Arend et al. (US 2004/0221263 A1) hereinafter Arend, Klein et al. (US 2005/0071784 A1) hereinafter Klein, Williams et al. (US 6,859,214 B2) hereinafter Williams, and Millmore et al. (US 2002/0180796 A1) hereinafter Millmore, to be relevant prior arts, wherein Ellenby being the closest prior art, while Powers, Vachuska, Arend, and Klein are prior arts of record, while Williams and Millmore are considered related prior arts. Independent claims 1, 10, 11 and 14 when considered as a whole, are allowable over the prior arts mentioned above. Specifically the prior arts mentioned above, either alone or in combination, fail to teach or suggest when considered as a whole, ***one of a plurality of predetermined contexts applicable to the type of the database objects*** as recited in the claims. For example, Claim 1 is directed to a method of providing access to database objects. In short, the method comprises displaying an object selection area, receiving a user selection of a database object, identifying an associated context, selecting a panel selection controls using the identified context, displaying the selected panel selection control in the user interface, and the selected panel selection control providing that the user can select for display any of the panels that are relevant to the context of the selected database object, wherein any of the selectable panels that relevant also to a different context can also be selected in a panel selection control associated with the different context. Particularly,

claim 1 states that the plurality of database objects are of a type that is configured to include a plurality of data portions, and that each of the database objects has stored therewith one of a plurality of predetermined contexts applicable to the type of the database objects and defining that at least one of the plurality of data portions is relevant for the predefined context. Later on the claim requires selecting a panel selection controls using the identified context. Ellenby, being the closest prior art, teaches all the limitations except multiple contexts being applicable to a particular type of object as required by the limitation highlighted above. Ellenby relates to remote addressing of objects. One aspect relied on by the Examiner was the teaching by Ellenby that different objects (e.g., a school, a financial building or a restaurant) can be selected and depending on the type of the selected object, a set of controls in the form of a toolbar are displayed which are useable to display panels containing data portions related to the selected objects (see previous Office Action, Pages 3-6). The Examiner took the position that Ellenby's types of object (e.g., a school) disclosed the "context" recited in Applicants' claims. However, all the independent claims now specifically state that ***one of a plurality of predetermined contexts applicable to the type of the database objects***, i.e., each type of the database objects can have plurality of contexts, or multiple contexts can be applied to the same type of object. As such, the claims now clearly differentiate between the type of an object and the context of the object. Ellenby does not teach or suggest such differentiation, and as a result he does not teach selecting a panel selection controls using the identified context. Therefore, Ellenby does not anticipate claim 1 and none of the prior arts mentioned hereinabove alone or in

combination cure the deficiency. Same holds for the subject matter of independent claims 10, 11 and 14. All the dependent claims are therefore also patentable over the prior arts of record due to their dependency from respective patentable independent claims.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
